

Biolinks Alliance 2019 Symposium

BOLSTERING THE REFUGES:

Restoring health and resilience to remnant ecosystems at a time of climate change

Some small patches of remnant vegetation make a disproportionately large contribution to the maintenance of a region's biodiversity and they require special attention.

Ecosystem components that need attention and why

Leading ecologists present the latest evidence about important functional processes and their restoration in fragmented landscapes

Lessons from inspiring local restoration projects

Join us for the 2019 Biolinks Alliance Annual Symposium featuring:

KEYNOTE PRESENTATIONS
from 4 leading researchers

WORKSHOPS
innovative projects and techniques

CONFERENCE DINNER
dinner speaker

24 May AT 9am – 5pm AT Euroa Football Club 2 DUNN ST, EUROA
Symposium tickets \$60 (*\$35 Biolinks Alliance Members*)
Dinner additional
