

# We need your help to monitor groundwater in the Strathbogies Ranges

**BOGIES**  
& BEYOND

One of the most important natural resources in the Strathbogies Ranges is groundwater. Many of us rely on groundwater to fill dams and tanks and it's critical for maintaining the health of our creeks and wetlands.

Currently the groundwater resources in the Strathbogies Ranges are poorly understood. To improve our understanding we would like to work with landholders who have a groundwater bore/well and would be interested in learning how their groundwater varies from season to season and year to year, over the next three to five years.

If you're interested in getting involved in this project, please complete and send in the EOI form that can be downloaded from [the Goulburn Broken CMA website](#) (under the Current Projects/Bogies and Beyond tab) by December 31 or phone Jenny Wilson on 5822 7700 for more information.
