

# Y WATER DISCOVERY CENTRE @ YEA WETLANDS 2019/2020 Speaker Series

CONNECTING, ENGAGING  
AND EMPOWERING COMMUNITIES  
TO BE MORE ENVIRONMENTALLY AWARE

The Y Water Discovery Centre @ Yea Wetlands proudly presents a series of six public information sessions. Featuring an impressive line up of keynote speakers and panelists, session topics will include:

- #1 Adapting Nature's Unique Ecosystems to Fire, Flood and Drought, 4 October
- #2 Climate Change and Community Responses, 15 November
- #3 The Importance of Wetland Habitats
- #4 Managing Water Resources to Secure Environmental Sustainability
- #5 Plant Biodiversity Loss from Environmental Changes
- #6 Sustainable Environmental Practices by Indigenous Communities

## Session #1

### Adapting Nature to Climate Change Friday 4 October 2019

The natural world is currently facing unprecedented challenges due to a combination of climate change, invasive species and habitat destruction. To help minimise the impact of these processes on populations, species, and communities, it is critical that natural systems can adapt and evolve. Professor Ary Hoffmann will explore this important topic and discuss options for the future.

- 5pm Walk in the Wetlands
- 6pm Session Commences
- 8pm Session Concludes

\$5pp donation

Drinks & nibbles included
